Wrangle Report

This is a report that briefly describe the effort exerted in this data wrangling project.

The dataset that you will be wrangling (and analyzing and visualizing) is the tweet archive of Twitter user @dog_rates, also known as WeRateDogs. WeRateDogs is a Twitter account that rates people's dogs with a humorous comment about the dog. These ratings almost always have a denominator of 10. The numerators, though? Almost always greater than 10. 11/10, 12/10, 13/10, etc. Why? Because "they're good dogs Brent." WeRateDogs has over 4 million followers and has received international media coverage.

The entirety of the project was carried on Udacity project workspace. However, the report was created and exported as PDF using Microsoft Office.

The wrangling process is as follows:

1. Gathering Data
2. Assessing Data
3. Cleaning Data

Each step will be further explained below

1. **Gathering Data**
   The data used was gathered from three different sources:

   A) Enhanced Twitter Archive
   The data is extracted programmatically for the purpose of this project by Udacity. This file is downloaded manually from the provided link and uploaded to the project work space.

   https://d17h27t6h515a5.cloudfront.net/topher/2017/August/59a4e958_twitter-archive-enhanced/twitter-archive-enhanced.csv

text	rating_ numerator	rating_ denominator	name	doggo	floofer	pupper	puppo
This is Phineas. He's a mystical boy. Only ever appears in the hole of a donut. 13/10 https://t.co/MgUWQ76dJU	13	10	Phineas	None	None	None	None
This is Tilly. She's just checking pup on you. Hopes you're doing ok. If not, she's available for pats, snugs, boops, the whole bit. 13/10	13	10	Tilly	None	None	None	None
This is Archie. He is a rare Norwegian Pouncing Corgo. Lives in the tall grass. You never know when one may strike. 12/10 https://t.co	12	10	Archie	None	None	None	None
This is Darla. She commenced a snooze mid meal. 13/10 happens to the best of us https://t.co/tD36da7qLQ	13	10	Darla	None	None	None	None
This is Franklin. He would like you to stop calling him "cute." He is a very fierce shark and should be respected as such. 12/10 #BarkW	12	10	Franklin	None	None	None	None
Here we have a majestic great white breaching off South Africa's coast. Absolutely h*ckin breathtaking. 13/10 (IG: tucker_marlo) #Bar	13	10	None	None	None	None	None
Meet Jax. He enjoys ice cream so much he gets nervous around it. 13/10 help Jax enjoy more things by clicking below https://t.co/Zr4hWfAs1H https://t.co/tVJBRMnhxl	13	10	Jax	None	None	None	None
When you watch your owner call another dog a good boy but then they turn back to you and say you're a great boy. 13/10 https://t.co/	13	10	None	None	None	None	None
This is Zoey. She doesn't want to be one of the scary sharks. Just wants to be a snuggly pettable boatpet. 13/10 #BarkWeek https://t.c	13	10	Zoey	None	None	None	None
This is Cassie. She is a college pup. Studying international doggo communication and stick theory. 14/10 so elegant much sophisticat	14	10	Cassie	doggo	None	None	None
This is Koda. He is a South Australian deckshark. Deceptively deadly. Frighteningly majestic. 13/10 would risk a petting #BarkWeek ht	13	10	Koda	None	None	None	None
This is Bruno. He is a service shark. Only gets out of the water to assist you. 13/10 terrifyingly good boy https://t.co/u1XPQMl29g	13	10	Bruno	None	None	None	None
Here's a puppo that seems to be on the fence about something haha no but seriously someone help her. 13/10 https://t.co/BxvuXk0UC	13	10	None	None	None	None	puppo
This is Ted. He does his best. Sometimes that's not enough. But it's ok. 12/10 would assist https://t.co/f8dEDcrKSR	12	10	Ted	None	None	None	None
This is Stuart. He's sporting his favorite fanny pack. Secretly filled with bones only. 13/10 puppared puppo #BarkWeek https://t.co/y70	13	10	Stuart	None	None	None	puppo

The extracted data from each tweet's text

B) Image Predictions File

This file (image_predictions.tsv) is present in each tweet according to a neural network. It is hosted on Udacity's servers and should be downloaded programmatically using the Requests library and the following URL: https://d17h27t6h515a5.cloudfront.net/topher/2017/August/599fd2ad_image-predictions/image-predictions.tsv

Tweet image prediction data.

C) Additional Data via Twitter API

Obtaining by querying Twitter's API then store in a txt file called tweet-json. Gathering this data requires a Twitter developer account.

A ready-made version was used in this work and was read line by line into pandas DataFrame with tweet ID, retweet count, and favorite count, and was later saved to a 'tweet_data.csv' file for future use. (without the index column so it will not appear as unnamed column in the file).

2. Assessing Data

After gathering each of the above pieces of data, they were assessed visually and programmatically for quality and tidiness issues.

The following findings were concluded

A) Tidiness:

- Dog stage data is separated into 4 columns.
- All data is related but divided into 3 separate dataframes.

B) Quality:

1. There are 181 retweets
2. Some dogs name is not standardized
3. invalid tweet_id data type (Integer instead of string)
4. Invalid timestamp data type (string not datetime)
5. Row 313 has no denominator
6. Row 315 and 1016 has no nominators
7. "source" values are formatted as <a> href=url
8. Missing photos for some IDs (2075 rows instead of 2356).
9. p1, p2, and p3 contain underscores instead of spaces
10. Some P names start with an uppercase letter while others start with lowercase.
11. There are two missing IDs (2354 instead of 2356)

Cleaning Data

The previous issues were cleaned as appropriate resulting in a high quality and tidy master pandas DataFrame.
